

Adhesives

The use of a material-appropriate adhesive is recommended to ensure an adequate bond between the impression tray and selected tray impression material. Kettenbach provides the appropriate adhesive for every type of material, so that the maximum effectiveness is guaranteed for optimum fitting accuracy.

Advantages

- ✓ Mucopren® Adhesive: guaranteed bond to acrylic dentures. Prevents the formation of gaps between the denture acrylic and reline silicone
- ✓ Identium® Adhesive: specially for Vinylsiloxanether® (Identium®). Good visual control, easy to apply, rapid evaporation time
- ✓ Panasil® Adhesive: specially for addition-curing impression materials. Good visual control, easy to apply, rapid evaporation time
- ✓ Reto® Adhesive: specially for condensation-curing impression materials. Good visual control, easy to apply, rapid evaporation time

The appropriate adhesive for every material!
